THE DECLINE IN GOLD-ITS EFFECT UPON THE TRADE OF THE CITY .- With a view of ascertaining what effect the decline in gold has had upon the are now in this city, and we learn that there is a wares of our merchants and their business, we made numerous inquiries, and learned that the decline had, except in a few instance, among retailers, not caused a reduction in the price of the that they have achieved, where r they have wares, but that it had materially affected the business of the city. The reason for this, as asserted, is that the planters and others in the country have had to sell their cotton and truck at lower rates than anticipated, because of the decline in gold, and have refused to purchase their supplies until they see a corresponding decline in the prices for them.

CRUMBS .- The two per cent. tax upon the real and personal property of the city, will realize a little over seven hundred and eighty-three thousand dollars per annum.

THE LATE W. F. DE SAUSSURE-TRIBUTE OF THE COLUMBIA BAR TO HIS MEMORY .- On Monday last there was a full assembly of the members of the Columbia Bar to offer a tribute of respect to the memory of the late Wm. F. DeSaussure, whose long professional career was characterized throughout by marked ability, legal learning and spotless probity. Chancellor Carroll was called to the chair. On taking the chair he made brief culogistic remarks, and was followed by Messrs. James D. Treadwell, Joseph Daniel Pope, John Watles and Wm. H. Talley. The following resolutions were adopted.

Resolved, That in the death of the late Hon. W F. DeSaussure the State is compelled to submit to the loss of one of her most valuable, honorable and distinguished citizens, who, for more than fifty years, embellished her institutions by his fifty years, embellished her institutions of the fifty years of the fifty

talents and attainments, and by his private and public virtues won the respect and confidence of all her people.

Resolved, That the people of Columbia are especially afflicted by the Providential visitation, as amongst them the whole life of the deceased was expended in acts of high honor and usefulness, for the benefit and adornment of society.

Resolved, That while the Bar of the State mourn court be death of Mr. DeSaussure as a calamity in over the death of Mr. DeSaussure as a calamity in the administration of the law throughout her

AMUSEMENTS.

Lucrezia Borgia Last Night. The performance of "Lucrezia Borgia" last night, by the McCulloch-Brignoli Opera Troupe, was far better in every way than the performance of either "Marta" or "Il Trovatore." There was an improvement in both orchestra and chorus, and all the members of the company exerted themselves to the utmost to make the performance, what it was-an unusually successful re

presentation of a most attractive opera. Miss McCulloch, who was in excellent voice shone particularly in the second scene of the second act. Her acting was both fervent and natural, and in her singing there was a dramatic intensity which she had not before displayed. Our Carolina prima donna was loudly and deservedly applauded.

Signor Brignoli is not an actor, but when he chooses he sings charmingly, and last night he was in the humor. The purity of his style, and the mellowness which his voice still possesses

were never more conspicuous. Miss Henne was a charming "Orsino," con firming the favorable impression made in a widely different role on the previous night. Her singing of "Il Segrette," the famona drinking song in the last act, was rapturously encored. Signor Petrilli was full of life, and his acting in

the second act would have graced any stage. His singing throughout was excellent. As we have said, the performance, as a whole was by far the best of the season, and the audience, more numerous than on either of the pre-

ceding nights, greeted every good point with long continued applause.

Miss McCulloch's Benefit. The performance at the Academy of Music to-night is for the benefit of Miss Isabel McCulloch, the gifted prima donna, who, during the week has delighted intelligent and refined audience by her rendering of the music of Flotow, Verdi and Donizetti. The opera chosen for the occa sion is "Lucia di Lammermoor," in which Miss McCulloch will have ample room for displaying all her dramatic talent and musical skill. The "Edgardo" of Signor Brigno!i was famous in Europe as well as in the United States, and the sweet-voiced tenor will ring the impassioned strains which fall to his share, with all the mingled delicacy and fire by which he won his fame Considered as a musical attraction alone "Lucia" should draw a large audience, and the fact that it is the benefit night of a Carolina genpursue a laborious and unthankful profession, should crowd the Academy from reof-tree to par as successfully to attain an honorable position upon the lyric stage, and it is fitting that the chief city of her native State should mark its high appreciation of the artistic merit which now adorns the modest dignity and sterling worth of the Carolina gentlewoman.

SUNDAY-SCHOOL TEACHERS' CONVENTION. In response to a call published in the daily papers, a number of Sunday-school teachers and others interested in the movement, met yesterday evening at the rooms of the Young Men's Christian Association. The meeting was organized by calling Mr. R. C. Gilchrist to the chair, and Mr. Virgil C. Dibble was requested to act as secre tary. The chairman stated that the object of the call was to reerganize the Sunday-school Union. Since the war, each congregation school and church had been by themselves, and they could have no aggressive action unless united. The South Carolina Sunday-school Union that was in existence before the war had funds, and did grea good by assisting the various schools and dissem inating books. If this Union was reorganized, it would not be sectional in its character, but they would all meet as Christians, ready to aid each other in a common cause. Messrs. Averill, Kugley, Nelson and others, spoke of the necessity for some immediate action. The Sunday-school teachers in the interior were anxious to push forward the work, and ou felt that it would redound to the advantage of the church, and cause a revival of religion and a growth in grace. It was suggested that the churches of the city should first form a Sundayschool Union that would be a nucleus, around which others would cluster, and a State Convention be then called. An inquiry was made as to the status of the old Suaday-school Union, which elicited the statement from the chair that Dr. Pettigrew was the former president, and Mr. Wm. Harral the treasurer. The union had one-third interest in the building known as the Depository in Chalmers street, in common with the Bible and Tract Societies. The funds were partly in North eastern and Charleston and Savannah Railroad made available.

On motion of Mr. Kugley, the chair was author ized to appoint a committee of three, who would confer with the officers of the union and take steps to revive the same. Messrs. W. F. A. Kugley, S. A. Nelson and Colonel McIver, were appointed. Some discussion arose as to the best time for calling the convention, but the matter was postponed to the next meeting, which was fixed for Monday night, when the committee

will also report. After the regular business was concluded, interesting statements were made by the gentlemen present of their past experience in Sunday-school matters, and suggestions offered as to the best course to be pursued to obtain a full knowledge of the number of children in the city who went to Sun day-school, and other statistics that might be useful. Crptain C. E. Chichester, a former citizen of Charleston, but latterly a resident of Kansas City, gave a pleasing description of the Sunday school movement in the far West.

The Second Presbyterian, Trinity, Bethel, Cita del Square and First Baptist Churches were rep resented at the meeting held last night, and though the attendance was not as full as expected, there was an earnest desire to press the good work forward, and by comparing notes to help each other in the common cause of Christianity, without attempting or wishing to create prose

MO SHAKING AND BURNING .- IT IS not necessary to journey from the tropics to Alaska in order to experience the extremes of heat and cold. Thousands undergo all the inconveniences of this thermometrical change every day with these involuntary shakers. What are they doing to expedite their return to a medium temperature?-to break the chills and banish the fe ver? Are they dosing themselves with quinine thereby imperiling the soundness of their bones and impairing the vigor of their brains and ner vous system ! Some of them are, no doubt, but not the majority of them, it is believed. The value of HOSTETTER'S STOMACH BITTERS as a harmless and certain specific for fever and ague, is understood and appreciated in all parts of the country where intermittents prevail. The residents of such localities begin to take it early in the spring as a protection against the miasma by which they are surrounded; not all of them, perhaps, for a blind adherence to error is the special ty of some people, but the greater number.

If there is any fixed fact in therapentics, it is this, that the Bitters are a far better safeguard against all the varieties of periodic maladies pro duced by unwholesome exhalations than any drug or compound in the materia medica of the profession. This assertion is made with all due respect to the faculty, but being an important rath, and one that nearly concerns the health of large settlements in various parts of the country, and indeed of the public at large, it is made fear essly. Founded on ample and unimpeachable testimony, it defles disapproval.

MAT SALVIA'S HAIR COLORING .-An insupurable objection to the continued use of most of the Hair Dyes of the shops, is the fact that they cause, in many instances, serious constitutional effects; as no lead or saturnine poisons are used in "SALVIA'S HAIR COLORING," there is not the slightest danger of palsy, neuralgia of the scalp and face, cholic, constipation, &c. This eminent chemist, for many years past, has been endeavoring to create a chemical preparation that would combine the valuable proper ties of a harmless, reliable coloring, and at the same time render its use impossible to be detect

ed by the closest observation. By the use of the ordinary Hair Dyes, the hair presents a dead appearance, and it is not noticed

at a glanco that it is dyed. By using this scientific compound, the coloring of the hair is so skilfully medified and mellowed as to defy detection, thus giving to the world an article that has been long and fruitlessly sought for, and guaranteed to give entire satisfaction.
